Planned to build an Ecommerce Website, but you are completely lack of programming and designing skill? Well, we have happy news for you. The happy news is Webnexs. No we aren't kidding, Just Surf the below article to know more about it.

What is webnexs?

Webnexs is an online digital store with over 40 products and counting, to makes your online business easier. The company is established in October 2015 and already served their service for 35+ clients worldwide. Webnexs got an excellent appreciation from all its client for their Quality Of Service.

Like most of company they started their journey with pre-designed beautiful email templates. Their quality of work is shown throughout the website as portfolio, which makes me to think that their testimonials spoken by their customer aren't wrong.

Let we see about their infamous products wcomm and wtemplates.

Wcomm

People think that developing an ecommerce store is a troublesome and challenging process which can be done either by professional developers or with lot of investment towards it. Well what you have been thinking is totally wrong when it comes to webnexs wcomm.

Wcomm is a product of webnexs which offers ecommerce development solution without any uphill process. Wcomm divides their plans according to the features and prices. They are Startup, SMB and Enterprises.

Startup

\$19/
INR 999 /month

Their base plan starts with \$19/INR 999 per month. Startup plan divided into three more plans. Every plan is uniquely different from other. Detailed feature lists can be seen on their product page.

SMB

SMB stands for Small and Medium Business. As in the plan name it's purely for developed for Small or Medium type stores. This ecommerce plan starts from \$749/INR 49,999. SMB is more customizable and mobile-friendly than the startup Plans. I personally recommend this plan if you already have well established physical store.

Enterprise

This is a complete package plan, which comes with each and every feature available in wcomm platform. More over you can modify to any extend based on your store's requirement. Its price is undisclosed cause the final price quotes will be purely based on your requirement.

Features of wcomm

Unlimited Products: You can keep adding any amount of products and define unlimited categories on your ecommerce Store.

Multi Product Images: Give a personal touch to your product by adding multi angle images. A Multi angle image purely gives you more sales on the products

Customer Management: Manage your customer's profile information and provide various permissions based on the user groups automatically or manually through customer management.

Payment Gateway: Integrate 90+ different payment gateways on your ecommerce store. wcomm is an official partner of popular payment gateway EBS and PayU Biz. They provide special discounts and facility for the customers who choose these payment gateways. You can receive payment from all around the world, no matter what's your customers region.

Automated Backup: Business worry free and feel secured that your store is safely backing up at regular intervals through the wcomm's automated backup feature.

Automated shipping management: Manage your customer shipping address, logistic service and delivery location with location map within very few clicks on your admin panel of your E-commerce website.
